

Raheef Al-Mahfoud

Civil engineer | Experienced engineering software | Graphic Designer

Contact Information

Phone: +49 16098194130
E-mail: raheef@almahfoud.de

Address: Himmelstraße 10, 22299, Hamburg

Summary

Experienced in civil engineering software, proficient in visual Art and graphic design, seeking to contribute to innovative projects while further developing my skills.

Education

- **Bachelor's Degree in Civil Engineering**

Al Hawash Privet University, 2019 – 2024

Skills

I have 9 Years experience in : AutoCad - Revit - CSI ETABS - CSI SAFE – Jawad - MS Office.

I have worked also with different graphic design apps such as : 3Ds Max - Studio 8 - Photoshop - Illustrator

Languages

Arabic: First Language

English: Proficiency

Deutsch: B1

Work Experience

Civil Engineer

University graduation project October
2024 October 9

- Designed a 16-story building.
- Structural analysis using engineering software Etabs Safe Jawad.
- Architectural design for each story using Autocad Revit.

Civil Engineering Farm project

- Designed a small warehouse with a water tank on top of it
- Calculated the minimum cost of the project.
- Analyzed the loads and water loads using Etabs.
- Analyzed the steel frame holding the water tank Using Etabs.

Logo and Poster Designer

Freelance 2019
April - present

- Collaborate closely with clients to understand and incorporate design preferences, ensuring alignment with brand identity.
- Develop visually impactful brand identities through the creation of logos and conceptualized posters.
- Generate innovative design concepts and ideas, considering client input, industry trends, and target audience preferences.
- Maintain consistency in design elements to uphold brand integrity across diverse deliverables.
- Adhere to project timelines, consistently delivering high-quality designs within agreed-upon deadlines.
- Foster clear and effective communication with clients, providing updates and incorporating feedback throughout the design process.
- Stay abreast of design trends, market preferences, and competitor analysis to enhance the relevance of designs.

Civil Engineering

Hospital

2025 February 7 – July 22

- Designed the interior of the basement 1 and basement 2 of the hospital
- Used Cad files and Revit files
- Calculated the minimum cost of the project.
- Analyzed the loads on the structure frames using Etabs.
- Exported the Etabs Result to Excel and calculated the right amount of steel and concrete to be used in the project
- 3D drawing of the reinforcement including (columns , beams , shear walls , Matt)

Civil Engineering

Fiber Optic & Coaxial Cabel installation

2026 May 1 - present

- Coordinating cable feed points and routing for fiber-optic and coaxial installations in residential units.
- Planning and starting drilling work for cable routes, conduits, and wall penetrations.
- Blowing fiber-optic cables through prepared tubes and ducts.
- Installing wall outlets and termination boxes and preparing cable endpoints.
- Fusion-splicing fiber-optic cables using a splicing machine and connecting coaxial cables.
- Coordinating the installation sequence to ensure efficient and orderly work in living quarters.
